Xsite® System

Explore new dimensions.

The Xsite system takes a great idea (frame and tile) and gives it a whole new dimension—literally.

First of all, Xsite tiles can be placed with more freedom than ordinary tiles. Opposite sides of the same structure can have different aesthetics and functions. And the tiles fit together snugly, so the look is virtually seamless.

Product specifications: Tackable acoustic tiles: Hanabi Ocean; Xsite Traxx, trim, Footprint worksurfaces and storage: Antique White; Overhead storage: Lunar profile with translucent fronts; Undersurface storage: Eclipse profile, Cushioned top pedestals with Structure Marble; Seating: Xtreme, Structure Marble and Bingo, Honey.

Next, Xsite components are horizontally supported, thanks to the patented Xsite® TRAXX® system. That means 100% off-modularity. So worksurfaces, storage, and structure directional changes can happen anywhere, and be altered with ease.

Xsite's structure adjusts in 3" width increments. So the system fits any space, no matter what its architectural features. This scalable structure lets you create spaces in the sizes and shapes you need.

Finally, Xsite's 3" deep structure accommodates unique Xsite performance tiles, turning otherwise wasted space into file holders, display areas, and hideaways for storage.

Discover horizontal support.

Until now, furniture systems were based on static, one-piece frames, joined vertically ... vertical connections that dictated component and worksurface placement.

Product specifications: Tackable acoustic tiles: Repetition Willow; Xsite Traxx, Footprint worksurfaces and overhead storage: Antique White; Overhead storage: Lunar profile with translucent fronts; Undersurface storage: Dark Chocolate, Flat profile with Arc pull, Cushioned top pedestal with Confetti Chocolate; Seating: Xtreme, Sophisticates Endive.

But Xsite uses Traxx, the Kimball Office patented horizontal mounting system. This means total off-modularity, designed right into the system. Traxx allows you to plan freely, with no placement obstructions and no restrictions.

There are virtually no vertical interruptions between tiles. So, besides freedom of placement, you get superior fit and finish. Tiles align almost seamlessly.

New freedom for tiles.

Unlike most systems, Xsite lets you place tiles independent of the structure.
Give one side a private office look, and mix tile sizes, surfaces, and functions on the other side.

Product specifications: Tackable acoustic tiles: Vibrations Jute; Xsite Traxx, trim, Slat and Storage tiles: Cinder; Footprint worksurfaces and overhead storage: Antique White, Lunar profile with translucent front (left), Flat profile (right); Cushioned top pedestals: Sandstone, Pollack Puff Daddy Black Sheep, Eclipse profile (left), Flat profile with Arc pull (right.)

Product specifications: Wood tiles: Espresso Walnut; Tackable acoustic tiles: Repetition Java; Embossed metal tiles, Xsite Traxx and trim: Platinum Metallic.

Place components anywhere.

Worksurfaces, storage, tiles, and power and data access can be placed independent of the structure, to suit the user and boost performance. And Xsite can be combined with other Kimball Office products, such as Traxx Presentation Tools, to create great meeting and collaboration spaces.

Choose from these aesthetic tiles: Tackable acoustic fabric, glass, perforated or embossed metal, wood, laminate, and paint ...

... not to mention Xsite's unique performance tiles.

PREMIER CONSULTING

Product specifications: Tackable acoustic tiles: Champagne Bubbly and Linen Copper; Paint tile: Bisque; Wood tiles: Espresso Walnut; Xsite Traxx, Trim and Embossed Metal tiles: Platinum Metallic; 3-high, 5-high and 7-high structures shown; Seating: Arpeggio, Bittersweet Tussah and Symphony Coffee, Espresso.

3" is big news.

You can **adjust the structure** in 3" increments. So planning around architectural features, like columns and stairwells, becomes easy.

Designed to **adapt almost infinitely**, Xsite is the system you won't outgrow.

2-high C stacking segment for increasing enclosure and creating hi-lo conditions

1-high end stacking segment for increasing enclosure and creating hi-lo conditions

Top spanner

Mid-structure support brace

2-way turn used to change direction (2, 3, and 4-way)

Xsite Traxx provides support for tiles, components and return walls anywhere

C used to start a run

I used to continue a run

Mid-structure support

Bottom spanner

Spanner connects C's, I's and Turns and allows 3" adjustment from 24-36" and 36-48" widths

24-36" or 36-48"

3-inch increments

There are minimal structural parts: C, I, Spanner, Universal Turn, and Xsite Traxx.

These simple units combine to build the **Xsite structure**; to turn corners; to accept stacking segments; to hold tiles in place; and to support worksurfaces and storage ... all with minimal mechanical fasteners. Because of its unique ability to adjust in width, Xsite **lets you expand** the structure for a 6' x 6' workstation up to an 8' x 8' in 3" increments, with no additional parts.

Product specifications: Tackable acoustic tiles: Linen Thunder; Xsite Traxx, Trim and Arc pulls: Platinum Metallic; Wood tiles, Footprint worksurfaces and storage; Espresso Walnut; Overhead storage: Linear-vertical glass; Evoke perforated metal modesty panel; Seating: Skye, Indulgence Tuxedo, Platinum Metallic and Acapella, Structure Brick, Espresso.

Build what you need, install it easily, and change it when you want—without being overwhelmed with inventory. That's especially handy for organizations that rearrange work areas often. Xsite is non-progressive, so you can remove components and disassemble the structure of one station without disturbing adjacent work areas.

Product specifications: Wood tiles: Amber Cherry; Tackable acoustic tiles: Saturn Spa; Xsite Traxx and Trim: Graphite; Footprint overhead storage: Square profile, Amber Cherry and Lunar Profile, Graphite; Footprint Worksurfaces: Amber Cherry and Antique White.

Scale the heights.

Of course Xsite is height-adjustable. Start with a base structure that's 2-high (30"), 3-high (42"), 4-high (55"), or 5-high (68").

7-high = 93"H

6-high = 80"H

5-high = 68"H

4-high = 55"H

3-high = 42"H

2-high = 30"H
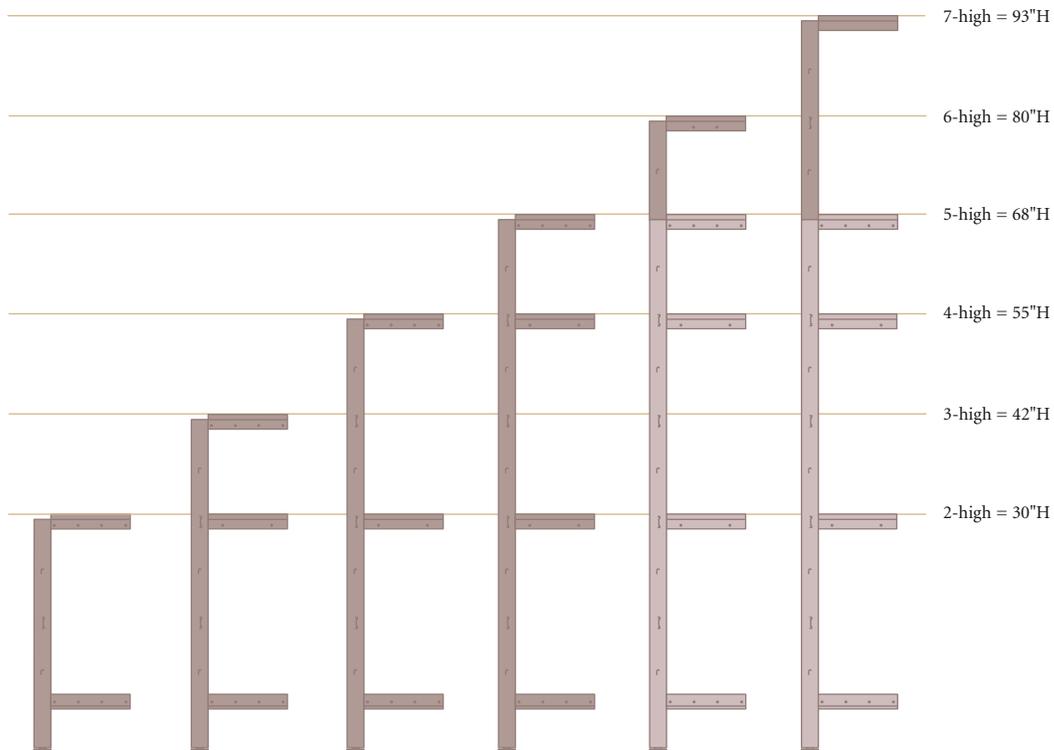

For added privacy or variation in heights, add a 1-high stacking segment to go to 80", or a 2-high to go to 93".

Claim inner space.

As you've seen, Xsite tiles come in an unmatched array of sizes, colors, textures, and materials.

Better yet, unique performance tiles make practical use of space inside the structure.

- Storage tiles accommodate CD holders, file pockets, web kits, and tip-out drawers
- Web kits hold books and magazines
- Tip-out drawers store up to 2" of paperwork
- CD holder will hold 12 CDs
- File pockets hang from Slat or Storage tiles, Xsite Traxx, or fit into file drawers
- Slat tiles increase utility and keep work tools close at hand
- Marker boards keep notes in view

17   Product specifications: Tackable acoustic tiles: Repetition Cornflower; Xsite Traxx and trim: Cinder; Footprint undersurface storage: Graphite, Flat profile with Full pull; Footprint overhead storage: Graphite, Lunar profile with translucent fronts; Footprint worksurfaces: Cloud; Seating: Xtreme stools, Woven Metals Steel.

Make good connections.

Xsite **expands your options** in power and data, too.

- Connect to building power through the floor, ceiling, or wall
- Route data cables through the top of the structure
- Access power and data at the base of the structure—or at the 2-, 3-, 4- or 5-high segment, with power/data tiles
- Two 10-wire power options provide shared neutral or independent neutral capabilities
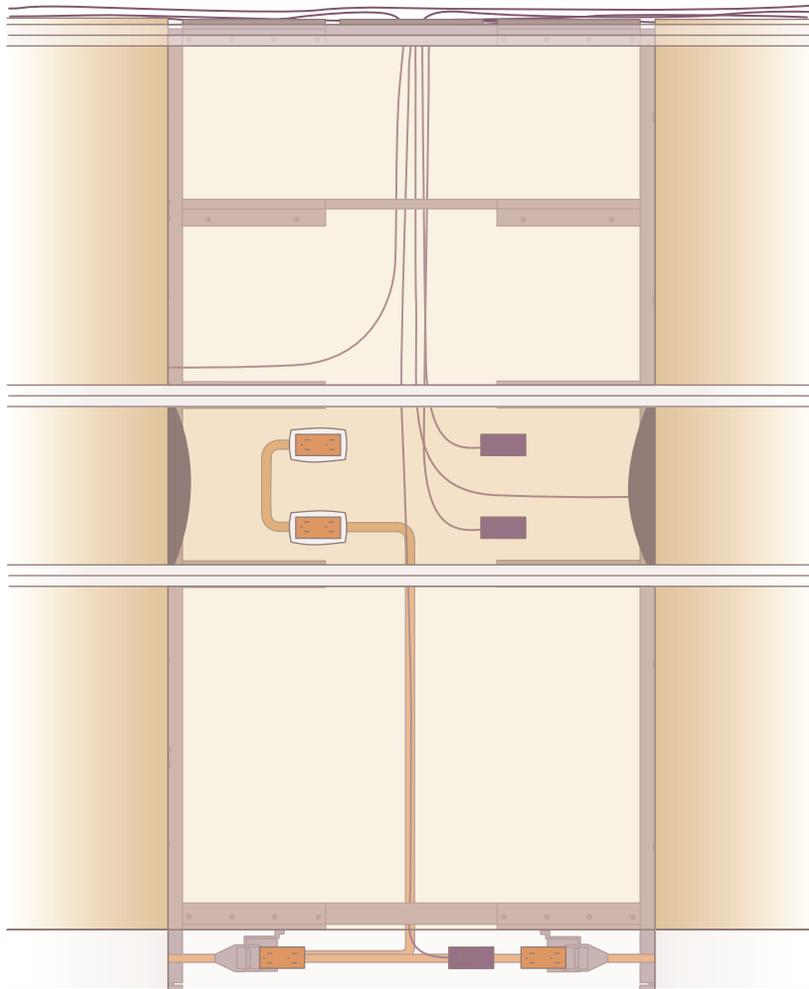

Power/data tiles can be placed wherever needed. They accommodate any combination of four power outlets and data ports.

Top channel lay-in accommodates data cables, which can be routed throughout Xsite's open structure. That makes it easy to access and change your cabling.

Product specifications: Tackable acoustic tiles: Vibrations Camel; Xsite Traxx: Platinum Metallic; Footprint worksurfaces: Natural Maple; Seating: Skye, Indulgence Mocha, Platinum Metallic and Acapella, Structure Adobe, Natural.
